- There will be no change in the price of regular gasoline;
- There will be no change in the price of premium gasoline;

The Commission would like to advise consumers that the market remains volatile. The Commission would also like to remind consumers that the market price is not the only factor that must be considered by the Commission when setting the price of gasoline each week. The Commission must also consider things like year-to-date margins, averages, and the general trends of market prices. These factors are reflected in the price that is set.

The Commission is including a chart showing the year-over-year comparison of fuel prices, including a comparison between the price of Brent Crude this time last year.
