Subject: Rate increase feedback

Hello,

I saw your call for feedback on a potential rate increase on Facebook and thought i would chime in. Instead of a rate increase, i call on IRAC to restructure how electricity is charged into an inclining rate structure like the rest of North America. It is incredibly backwards that the more electricity you use, the less you pay. Those who use the least are essentially forced to subsidize the use of power by households with air conditioning and industrial corporations. This is unfair, and also an inefficient policy. I want a system where costs are distributed fairly based on how much grid capacity each household/business uses, which is an inclining rate structure.

Thanks,

Jill MacIntyre
