My parcel, highlighted in red below, abuts the Wildcat Road, a Class 2 seasonal highway. To the east, within less than 1 KM are approximately 100 cottage lots, all of which are accessed off a dozen Class 2 seasonal highways. Approximately ½ half Km to the west, the Corpus Christie subdivision of approximately 30 cottage lots are all accessed off a Class 2 seasonal highway. Approximately one Km to the south, second image below, is a 18 lot subdivision accessed through the Coffin Road, a Class 2 seasonal highway.

The simple question is, when every cottage lot around the parcel I own is accessed by a Class 2 seasonal highway, why can't my proposed four cottage lots of approximately two acres each be granted the same access.
