**Subject:** Waste management proposed increases

I am against the proposed increases by Island waste management. Not all residents put the same amount into the waste stream. There should be a method to charge on what you use. I only need to put my waste bin out once a month, at most, and I rarely use the green bin, as I compost at home. Yet I am forced to pay the same as a household that produces full bins and sometimes extra bags every two weeks. That is not fair.

Sincerely, Lois Doan [REDACTED]
