---

Good afternoon Mr. Rafuse,  
Please see the attached letter in regards to Appeal # LA22-012.

I have also attached a couple pictures of the staked building location for your information and better understanding of the property layout.

The 4 taller yellow stakes shown are the actual outside corners of the building and the wooden red top stakes are placed around them for the foundation trenching which also include the laser transit marked required cut depth.

Also note the building distance from boundary is twice the required minimum setback allowance given from the PEI Lands Division.

Thank You,  
Anthony McQuillan
