Subject: Letter to mecl re oatt true up costs
Attachments: Commission Ltr re SSide OATT True-up Jan 28 2019.pdf

Hi Cheryl,

Do I understand that this is the final true up for all items and that \$403K and change will settle requirements of the irac determination? Can you advise.

Summerside is of the opinion that the losses are valid in a technical sense the same way the west cape and other direct assignment lines have been dealt with given where the metering for that line is located. i.e. if recording usage at the wrong end than the losses being paid to mecl as they calculated them included the wrong loss number all along the way. Until the rate was set permanently.

Look forward to your clarification of the charges listed as C, D, E, and F. As Summerside understand these are not required to satisfy the ruling/direction in this letter.

Regards,

Greg Gaudet, P.Eng., Director of Municipal Services
