Attention: Nicole McKenna

Dear Ms. McKenna:

Re: UE41401 - Prince Edward Island Energy Corporation ("PEIEC") Application for Approval of 2022-2024 Electricity Efficiency & Conservation Plan

On December 31, 2021 the Prince Edward Island Energy Corporation ("PEIEC") filed its 2022 Energy Efficiency and Conservation Plan ("EE&C Plan"), with the Island Regulatory Appeals Commission ("the Commission"). The EE&C Plan was revised January 24, 2022.

In conjunction with the Commission's regulatory review of this matter, PEIEC is filing the detailed Plan Model with the Commission together with a pdf of the dashboard tab of the Model. Given the proprietary and commercially sensitive nature of the Model, and the various confidential information included therein, PEIEC is requesting a "Commission only" confidential filing of the Model. Public disclosure of operational detail of the Model has the potential to cause harm to PEIEC. Given these factors we are requesting this confidential filing treatment.

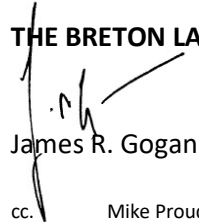

The Model is being filed in its static form. The Model is in Excel format. For this reason we are requesting consent to file this in electronic form only.

At the request of the Commission, PEIEC would be pleased to facilitate a technical overview of the Model for the Commission by the corporation's staff, and its consultants, Grant Thornton (developer of the Model).

Subject to the Commission's consent to the electronic filing of the Model, I confirm four (4) hard copies of the dashboard tab of the Model will be delivered to the Board.

We would be pleased to respond to any questions of the Commission. Thank you for your consideration of this matter.
