Island Regulatory & Appeals Commission
PO Box 577
Charlottetown PE C1A 7L1

Dear Commissioners:

The Company filed a supplemental capital budget request with the Prince Edward Island Regulatory and Appeals Commission ("Commission") on July 16, 2025 requesting approval of budget cost changes related to the Advanced Metering for Sustainable Electrification Project [Docket UE20745]. On September 2, 2026, the Commission submitted interrogatories ("IRs") to the Company which included a deadline for the Company to respond to public questions of September 25, 2026.

The Company's focus in recent months has been on responding to IRs and preparing for the public hearing on the On-Island Capacity for Security of Supply at the end of August. As a result, other regulatory priorities have been deferred including the Company's quarterly reports to the Commission on this project. Since the hearing, the Company has been focusing on responding to the Commission's IRs on other regulatory proceedings, catching up on project and financial reporting to the Commission that have lagged and preparing new applications that need to be filed as soon as possible.

With limited resources available, the Company does not have sufficient resources to address these IRs until late in October and respectfully requests an extension to November 18, 2026. This will allow sufficient time to provide fulsome responses. In the meantime, the Company commits to providing the first and second quarter reports on the Advanced Metering for Sustainable Electrification Project by September 25, 2026 and the third quarter report in conjunction with these responses. This will give the Commission a clearer picture of how the project is progressing in the interim.

If you require further information, please do not hesitate to contact me at 902-629-3641.

Yours truly,

MARITIME ELECTRIC

Gloria Crockett
Director, Regulatory and Financial Planning
