Hi I would like to express my concerns about the latest ask for a rate hike to pay for Fiona , I'm totally against this as our electricity prices are too high now , we (Islanders ) didn't bring the storm , maritime electric should of been better prepared as climate change is all over the world. But instead of trimming trees and burying lines they choose to pay bigger dividends to its share holders , I buy a service and the price should not change every 3 months because they ask for it too .Is there "Any" responsibility on maritime electric part or is it let it storm and we will just up our rates so we can still make a huge profit god forbid they don't a profit.  
Take this profit and replace your own equipment we don't own it we buy a product period .  
So thanks for reading this  
Us low income residents can't afford these hikes .
