**Subject:** Message from Deputy Minister Forbes on Clean Fuel Regulations

Dear Mr. Mackenzie:

I am writing to follow-up on the correspondence that the Minister of Environment and Climate Change sent to you on May 25, 2023, regarding the importance of the *Clean Fuel Regulations*, and encouraging regulators to assess the full suite of compliance options under the *Clean Fuel Regulations* in considering any possible fuel price change.

I submit to you for your consideration the attached technical feedback on the assumptions and methodologies used in the analysis conducted by Gardner Pinfold Consultants Inc. and Grant Thornton Inc., which I understand is informing your fuel price setting process.

Technical questions can be addressed by Paola Mellow, Executive Director of the Low Carbon Fuels Division at Environment and Climate Change Canada.

Sincerely,

**Chris Forbes**  
Deputy Minister  
Environment and Climate Change Canada
