Hello Gloria: Having skimmed through the responses, I would appreciate some specific clarifications please:
For IR-3 question (c) requested the "financial return results" of the RI program. The response included subjective results but no specific return data.

For IR-5 response informs that "full deployment of meters is required". Assuming that individual meters have battery back-up to maintain communication paths during power outages (please confirm), what is the maximum outage period before meter power must be restored?

IR-8: Is MECL purchasing "a section of T-23" as stated or is the intention to purchase the entire T-23 line. What are the T-23 distances involved?

Thank you,
Roger King
