Subject: Diesel?
Date: Monday, August 10, 2026 11:58:41 PM

Please do not allow Maritime electric to spend our money on a diesel option to meet PEI's electrical needs.

The thought that in this era of concern we would invest in a diesel future for years to come? When there are cheaper and more environmentally positive options.

Please know many of us are deeply concerned that such a backward decision will be allowed.

We are keen to see if IRAC has the fortitude to put citizens health and future first.

No diesel generators!

Jan Rudd
