

Comments UE20946 GRA deadline September 2, 2022

Submitted by John te Raa

These are generic comments based on my understanding as of this date.

Maritime Electric in response to my IR-2 and IR-3 refers to Docket UE22503 Rate Design study.

This rate design study focusses on farm related matters. Maritime Electric met with the Minister of Agriculture and the Minister of Energy to discuss this subject.

The proposed new rate structure Docket UE22503 has not been approved. In my view it falls short in dealing with inequities between rate classes and within rate classes. The very issues that I addressed in my IR-2 and IR-3.

In the GRA Maritime Electric seeks approval to spend money on capital improvements on the Bedeque/Richmond Transmission system connecting to the original cables. Docket UE20736 submitted July 6, 2022 has not been approved. I have submitted interrogatories in the Capital budget submission Docket UE20735 related to this matter. Responses are due September 9, 2022.

At this time, I am not in a position to make constructive comments related specifically to the GRA Docket UE20946.
