RE: IWMC Proposed Rate Increase

Hello,

I am writing to indicate I'm against a 12 percent proposed waste watch rate increase.

While costs may be increasing, any increase should only be comparable to the wage increases the people of PEI might have received for the year or to the consumer price index increases of 1.9 percent for 2024.

12 percent is too high and sets a dangerous precedent of what people can expect again in the future.

The people of PEI are struggling enough. \$25 is a lot of money for many people, including myself.

Please ensure if any increase is given, please keep to a more tolerable level.

Thank you.
