

Hello,

Regarding: WM01306 – IWMC – Rate Increase – December 13, 2021

- [Notice of Application – IWMC Rate Increase – January 5, 2022](#)
- [IWMC Application – Rate Increase – December 13, 2021](#)

I am writing as a seasonal property owner and acknowledge I have just missed the communication deadline for submission of my concerns.

I do not see how a residential year round increase of 5% when this services comes 12 months a year justifies an almost 15% increase in fees for seasonal residents whereby these properties are only serviced maximum 6 months per year, so on an equivalent basis, how do you justify a threefold increase when it only requires half the annual expense from staffing to equipment. A far more equitable way to justify your increases would perhaps be meeting in the middle and putting more of an increase on annual full time users as opposed to passing this expense on to those who only use their properties less than 6 months per year.

Can someone kindly reply to me in writing or via telephone to justify the rationale of this increase.

With Kind Regards,

Jeff Fraser
