

## NOTICE TO INDUSTRY

June 3, 2025

**Re: Annual Rental Rates for Residential Propane Tanks and Cylinders**

---

The Commission is reviewing the allowable annual rental rates for residential propane tanks and cylinders.

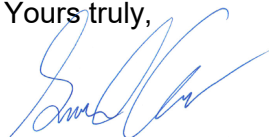

The Commission, therefore, invites all PEI propane suppliers to comment on the existing rental rates and to make recommendations for changes to this tariff for all sizes of residential propane tanks and cylinders.

If you are suggesting an amendment to the existing rental rates, please provide complete supporting rationale to justify your suggested revised rates including, but not limited to:

- information respecting the cost to the supplier of the tanks and regulator equipment;
- the useful life of the tanks and regulator equipment;
- a reasonable rate of return that should be permitted on the rental; and
- such other information you may deem relevant, along with full financial information to allow the Commission to determine a reasonable annual rental rate on residential propane tanks and cylinders.

If wish to comment you are asked to provide your comments and all supporting information to the following email address: [petroleuminquiries@irac.pe.ca](mailto:petroleuminquiries@irac.pe.ca). We request that all submissions be made no later than June 27, 2025.

Yours truly,

Sam Clow  
Senior Regulatory Officer
