

UE20604 – MECL – ECAM Rate Increase – December 17, 2021

APPLICATION AND EVIDENCE OF MARITIME ELECTRIC COMPANY, LIMITED

December 17, 2021

Questions submitted to Maritime Electric via email Jan. 13, 2022

By John te Raa

Question #1

What was the actual date that Point Lepreau returned to full service generation?

Question #2

What are the actual number of MWh that Maritime Electric obtained from Point Lepreau during 2020 and 2021 respectively?

Question #3

Referring to Section 6.1 Table 2 Point Lepreau – Unscheduled Outages.

For each time period indicated under ‘Full Outage Days’ and ‘De-rated Outage Days’.

What is the corresponding ISO New England ‘Day-Ahead’ price at the New Brunswick/Maine interface?

Question #4

In addition to the replacement energy cost of \$4,995,650 the increased maintenance and repair cost was \$1,700,000 as identified in Section 6.3 line #301 of the evidence submitted.

This is a cost equivalent to \$23,300 per day for each of the 73 days of full outage.

What is the breakdown of these costs?
